

CREATE FLASK PROJECT

PROJECT NAME	PERSONAL EXPENSE TRACKER APPLICATION
TEAM ID	PNT2022TMID25032
SETTING UP APPLICATION ENVIRONMENT	CREATE FLASK PROJECT

STEP 1: Open a new Python file and start coding

The screenshot shows the PyCharm IDE interface. The main editor window displays a new Python file named 'hello.py' with the following code:

```
1 from flask import Flask
2 app = Flask(__name__)
3 @app.route('/')
4 def index():
5     return 'hi>FLASK PROJECT</hi>'
6 if __name__ == '__main__':
7     app.run(debug=True)
```

The left sidebar shows the project structure with 'hello.py' selected. The bottom status bar indicates the file is 724 characters, UTF-8 encoding, 4 spaces, and Python 3.7 interpreter.

Step 2: Run the Python file using command `python filename.py`

```
Select Command Prompt - python hello.py
